

Application of the COVID-19 Vaccination Passport in Nunavik

SEPTEMBER 10, 2021

DIRECTIVE

The COVID-19 vaccination passport is to be deployed in Nunavik as elsewhere in the province;

- **For youth 13-17 years of age**, the application of the vaccine passport for in-community activities will be delayed until November 1st, 2021 (given the school vaccination deployed only in fall 2021);
 - ✓ From October 1st, 2021, a proof of vaccination showing that at least one dose of vaccine received should will be required for some extracurricular activities for this age group;
 - ✓ From November 1st, 2021, the regular vaccination passport will be used for all individuals 13 and older;
 - ✓ This delayed application does not apply to activities involving travel between communities: the vaccine passport is already required for the organization of any activity requiring a vaccine passport and involving travel between multiple communities.
- For individuals of all ages, the requirement to present photo-ID will alongside the vaccination passport will not be applied in Nunavik given the challenges that many face in obtaining identification with a photo (a piece of identification will have to be presented with or without photo).
- Those travelling outside of Nunavik will need a photo-ID to use the vaccination passport outside the region.
