

Ulaayu Learns About Rabies

Rabies is a serious disease of animals that can also affect people.

Protect your family and pets by following some simple steps:

Make sure your pets get their regular rabies shots

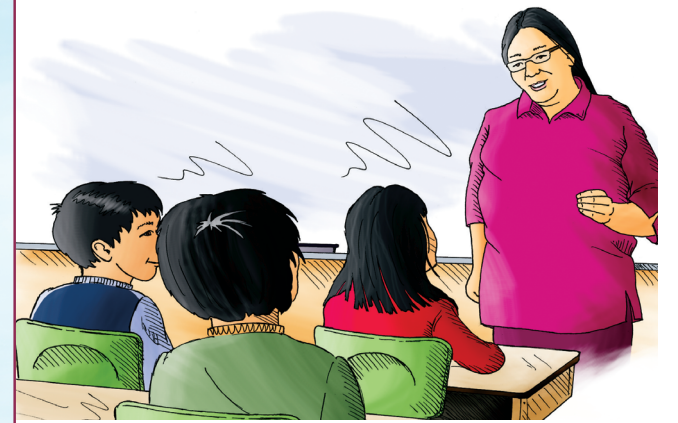

Keep your pets under control at all times

Avoid wild animals such as foxes, wolves, coyotes and bats and report any cases of strange acting animals to adults in your community

For more information on rabies in Nunavik please go to:
www.nrbhss.ca/rabies

Learn about the risk of rabies in your area

Wear gloves when handling wild animals and always wash your hands afterwards

See your family doctor or nurse if you get any animal bites or scratches, and immediately wash any wounds with soap and water
