Date of visit→																				
(A) Number of lost doses																				
(B) Number of remaining doses																				
(C) Number of doses given																				
(D) Number of doses to be taken by next visit																				
(E) Number of doses taken since last visit	0																			
(F) Cumulative number of doses taken	0																			
Initials**																				

Comments: _____

Procedure:

- (A) Enter the number of doses lost by the patient since their last visit.
- (B) Enter the number of remaining doses in the pill bottle brought by the patient.
- (C) Enter the number of doses given to the patient during the visit and tell them to bring their pill bottle to the next visit.
- (D) Enter the result of the following sum: doses remaining (B) for the **current visit** + doses given (C) for the **current visit**.
- (E) Enter the result of the following subtraction: Number (D) of the **last visit** – the sum (A) + (B) of the **current visit**.
 Confirm that the number of doses taken is not greater than the number of days between the two visits.
- (F) Enter the result of the following sum: number (F) of the **last visit** + number (E) of the **current visit**.

* Enter the total number of doses taken and refer to the [Clinical and radiological follow-up guide](#) for the follow-up plan.
 ** Nurse's initials. Enter the name/file number/scheduled date of the next visit in the agenda and write the scheduled date in lead in the column for the next visit.
